Planning

Role: Moderator (the game's host)

Components

- 5x5 grid question board
- 5 questions for each column from 1-5 with different categories (total of 25 questions).
- 100-500 point value for each column category.
- 30 second timer for each question.
- For each question, the contestant needs to answer in the form of a question.

Steps

1. Contestants write their names to display.
2. Start the game.
3. Display the board and show what the categories are for each column.
4. Choose which contestant to select the point value and the category.
5. Display and explain the question.
6. If the contestant answers correctly, add points to their score. If wrong, subtract points from their score.
7. The game will move on until all the questions and answers are complete.
